Appendix B
- Awards

1.0 • Overview
Award Tracker is an amateur radio award tracking application designed to work on Microsoft Windows ™ operating systems. It has been tested to work on Windows 7 (32 & 64 bit), and Windows 10 (64 bit).

Award Tracker currently supports these logging programs:

AClog (Latest Version)
CommCat (version 4.x)
CQLog
DXBase (Version 1.x)
DXLab's DXKeeper (Version 10)
Ham Radio Deluxe (version 5.x & 6.x)
PSK Express (version 1.3)
Logger32 (via ADIF & ADIF Audit Trail.txt)
Micro Log
NetLogger
QSO Manager
Swisslog
XMLog

If your log program is not listed it still may work if the database type and field names are the same as one of the versions listed.
If your log program is not listed, or you find that your version of a particular log program does not work correctly, you can export your
log to ADIF format then import that file into Award Tracker as well. Award Tracker currently can process awards for ARRL, 10-10 International,
CQ, OMISS, 070 Club, European PSK Club, Islands on the Air (IOTA), Summits on the Air (SOTA), Asian-African Conference Award (AAC), and
Radio Amateurs of Canada (RAC). Not all awards are available at this time for all listed organizations. More awards are being added regularly.

Award Tracker also allows for the operator to create custom queries. Using basic SQL statements you can query the database regardless of which log program you are using. This is possible because the database of the log program is imported into a temporary database when it is loaded into Award Tracker.

How it works.
Award tracker imports the fields of your data source into ADIF version 3.x compliant data. From there it is filtered returning the results for the award you have selected.

NOTICE: Award Tracker uses ADIF compliant data to process the awards you select. If your data is not in the correct field or is not formatted correctly the award may not produce accurate results. See adif.org for details.

NOTICE: Award Tracker is regularly being updated so this manual may not be completely up to date.

WARNING: Do not enable "Debug Mode" unless asked to do so. It is for troubleshooting issues with Award Tracker and will severely degrade its performance.

Back To Top

2.0 • Installation

- 1. Download Award Tracker and save it to a location of your choice.
- 2. Run the AwardTracker.msi file you have just downloaded and follow the prompts.

Back To Top

3.0 • First Run (New Install Only)

After you install Award Tracker, you will be notified to select the log program you are using from the configuration.

Click on 'OK' and the configuration form will be displayed.

Select the log program you use and click on the save button. You will now receive a prompt that your data file or database is not found.

Click 'OK' and one of two dialogs will be displayed. If you select Ham Radio Deluxe you will see a dialog similar to the one below.

All other log program types will have a file open dialog box. You will need to browse to your log program's database or data file
and click on "Open". By default Award Tracker is set to sync the database automatically and should synchronize the database. After this initial step is complete you should update the support files. You may be notified of this by Award Tracker. To download the support files, click on the "File" menu option. Under file click on "Update Support Files". You will then see a dialog box describing which files Award Tracker is downloading.

When all the support files are downloaded the dialog box will close.

[Back To Top](#)

4.0 • Configuration

To load the Award Tracker Configuration in the menu select Settings -> Configuration. You can make all the changes necessary in all tabs then click on the "Save" button to save your changes. If you click the Cancel button then all the changes you have made will be lost.

Each of the tabs in the configuration contains options for Award Tracker as well as specific organizations or log programs.

- Award Tracker – Contains the basic Award Tracker configuration options.
- Support Files – Contains the url locations for some of the Award Tracker support files.
- General – Contains the band options for the General 'WAS Summary'.
- 10-10 – Contains the options for [Ten-Ten International](#) awards.
- 070 Club – Contains the configuration options for the [PODXS 070 Club](#)
- OMISS – Contains the configuration options for [OMISS](#)
- IOTA – Contains the configuration options for [IOTA](#)
- Search – Contains the configuration for the fields to be returned in the search tool.
- HRD – Contains the configuration of the url's for the support files for [Ham Radio Deluxe](#).
- ACLog – Contains the configuration options for [ACLog](#).

The 'Save' & 'Cancel' buttons

Make all required changes to the Award Tracker configuration then click on 'Save'.

Clicking 'Cancel' will undo all changes you have made to the configuration.

[Back To Top](#)

4.1 • Configuration • Award Tracker

Log Program

Using the radio buttons in the 'Log Program' section select the log program you are using.

You may choose from Ham Radio Deluxe, ACLog (Latest Version), DXLab, PSK Express, or ADIF File. If you select ADIF File this file must conform to
the ADIF version 2.x or 3.x standards at http://www.adif.org.

Sync Logbook Database

Setting the 'Sync Logbook Database' option to 'Manual' will synchronize the log program database only when the user click on the refresh icon.

!!If you use this setting be sure to click on the refresh icon if you change log programs!!

Setting it to 'Auto' will cause Award Tracker to synchronize the log program database every time Award Tracker is started and if you change the 'Log Program' type.

CSV Export Headers

Setting the 'CSV Export Headers' radio button to 'Yes' causes the CSV export option to include the field names when the file is created.

Setting the the option to 'No' will cause the CSV export to only include the data for the records and will not include the field names.

Assume TX Power

Setting the 'Assume TX Power' radio button to 'Yes' will set the 'TX_PWR' field to the value entered in the box if the power field is not set in the source data.

By setting the option to 'No' there will be no change to the 'TX_PWR' field.

Band to Frequency?

Setting the 'Band to Frequency' to 'Yes' causes the 'FREQ' field to be populated with a default value based on the band if the 'FREQ' field is empty.

Band to Frequency Chart

- **Band Frequency**
- 70CM 443000
- 1.25M 220000
- 2M   144000
- 6M   54000
- 10M   28000
- 12M   24000
- 15M   21000
- 17M   18000
- 20M   14000
- 30M   10100
- 40M   7000
- 60M   5000
- 80M   3500
- 160M   1800

Check for Updates

Set the 'Check for Updates' option to 'Yes' (default) to have the application automatically check for updates.

Setting the option to 'No' will prevent the application from checking for updates.

[Back To Top](#)

4.2 • Configuration • Support Files

"Award Url's"

Enter the URL of the Award Tracker 'Award List'. Default is
https://www.w5djt.com/awdtrk/awardurls.txt.
If you change this address the file must conform to the correct format.

"Country File"

Enter the URL of the Award Tracker 'Country File'. Award Tracker uses the same country file as version 3 of ACLog.

Default is http://country-files.com/n3fjp/ADIFCnt.txt.

4.6 • Configuration • 070 Club

- **070 Club Fields**
    - Use the drop down list to select which field the stations 070 number is stored in.Options are:
        - COL_USER_DEFINED_0
        - COL_USER_DEFINED_1
        - COL_USER_DEFINED_2
        - COL_USER_DEFINED_3
        - COL_USER_DEFINED_4
        - COL_USER_DEFINED_5
        - COL_USER_DEFINED_6
        - COL_USER_DEFINED_7
        - COL_USER_DEFINED_8
        - COL_USER_DEFINED_9

    Not all log programs will have these fields populated when imported into Award Tracker.

- **070 Club Files**
    - PSK Golf URL
    - Enter the URL of the PSK Golf file. Default is https://www.w5djt.com/awdtrk/070pskgolf.txt.

[Back To Top](#)

4.7 • Configuration • OMISS

- **OMISS Field**
    - Use the drop down list to select which field the stations OMISS number is stored in.
      Options are:

- OMISS
- COL_USER_DEFINED_0
- COL_USER_DEFINED_1
- COL_USER_DEFINED_2
- COL_USER_DEFINED_3
- COL_USER_DEFINED_4
- COL_USER_DEFINED_5
- COL_USER_DEFINED_6
- COL_USER_DEFINED_7
- COL_USER_DEFINED_8
- COL_USER_DEFINED_9

Not all log programs will have these fields populated when imported into Award Tracker.

4.9 • Configuration • Ham Radio Deluxe ™

Under Construction.

[Back To Top](#)

4.10 • Configuration • ACLog ™

Under Construction.

[Back To Top](#)

4.11 • Configuration • Logger32 ™

Logger32's database can not be read by Award Tracker. Award Tracker can however use the ADIF Audit Trail function of Logger32 to load the records into the temporary database.

If you have installed Logger32 anywhere other than the default "C:\Logger32" then the below instructions
will not work. In the future plans are to make it work with user configured path settings, but this release is to just get the process available and tested.

Working with Logger32 and Award Tracker is not as straight forward as other logging applications.
In order for Award Tracker to read the data from Logger32 you must complete the following steps that utilize ADIF formatted files generated by Logger32. Once you have Award Tracker
and Logger32 configured correctly there are no differences in function of Award Tracker vs other logbook applications.

First you need to open Logger32 to generate the base ADIF file.
Click on File -> Export Logs -> ADIF (.adi) file

Make sure you have "All Operators", "Include logbook informational entries", "Export Latitude/Longitude",

and "Export full county name" are all checked.

Click the "Start" button.
In the "Open" dialog filename text box type "AwardTracker.adi" then click "Open". I suggest using the default
C:\Logger32 as the path of the AwardTacker.adi file so the two files that Award Tracker will use will be
located in the same folder.

If you receive this alert then click on "Replace".

Award Tracker configuration.

Turn on the ADIF Audit Trail in Logger32 using Award Tracker's configuration. Click on Settings -> Configure then the Logger32 tab. Check the 'Enable Logger32 "ADIF Audit Trail" ' box and click save.

Now Close and Reopen Logger32. If everything is correctly set when you add, edit, or delete a log
entry it will be written to "ADIF Audit Trail.txt" inside the C:\Logger32 folder. This allows Award Tracker to be able to load the latest data each time you 'sync' the database.

5.0 • Filters

The filters allow you to customize some awards to limit your results according to the number of records, band,

mode, power, and qsl received.

5.1 • Filters • Records

The records filter is pretty straight forward. Enter the maximum number of results you want Award Tracker to return

for the selected award.

5.2 • Filters • Band

The band filter allows you to limit your results, well, by band. If you want to return results for a single band

simply use the band number followed by "M". Example: 10M. You can use "HF", "HF+6", "WARC", or "VU" instead if you wish to

show results within a group of bands.

Group to band list:

- HF   160M, 80M, 40M, 30M, 20M, 17M, 15M, 12M, and 10M
- HF+6   160M, 80M, 40M, 30M, 20M, 17M, 15M, 12M, 10M, and 6M
- WARC   30M, 17M, and 12M
- VU   6M, 2M, 1.25M, 70CM, 33CM, 23CM, and 13CM

5.2 • Filters • Mode

The mode filter allows you to limit your results by mode. If you want to return results for a

single mode

simply enter the mode into the box. Example: CW. You can use "DIGITAL", "PHONE", "PSK", or "SSB" instead if you wish to

show results within a group of modes.

Group to Mode list:

- DIGITAL   Includes all modes except : CW, SSB, LSB, USB, FM, AM, and SSTV
- PHONE   Includes: SSB, LSB, USB, FM, and AM
- PSK   Includes: PSK10, PSK31, PSK63, PSK63F, PSK125, PSKAM10, PSKAM31, PSKAM40, PSKFEC31, PSKHELL, QPSK31, QPSK63, and QPSK125
- SSB   Includes: SSB, LSB, and USB

Anniversary QSO Party

Award tracker will automatically change the anniversary number in February of each year

for the Anniversary QSO Party. For example the year 2016 is the 53rd

anniversary and Award Tracker will calculate for the 53rd

anniversary through Jan 31, 2017 to allow everyone time to get their log submitted. On Feb. 1, 2017 Award Tracker will start calculating for the 54th anniversary and so on for the following years.

Powered by [Mantis Bug Tracker](#)

Award Tracke 3.3.2 (Released 2024-01-15)
0000869: [ARRL Awards] ARRL – WAS Triple Play:: Error – Object reference not set to an instance of an object. (w5djt)
0000866: [10-10 Awards] Add ability to modify 10-10 Used Lists. (w5djt)
0000868: [10-10 Awards] Notify user if 10-10 bar used list does not contain multiples of 100. (w5djt)
0000858: [10-10 Awards] Add ability to export 10-10 used lists (w5djt)
0000861: [Other] hide user name from path when submitting debug log. (w5djt)
0000867: [10-10 Awards] Application crash when trying to delete entries fro m10-10 used list. (w5djt)
6 issue

Award Tracker 3.3.1 (Released 2022-12-25)
0000819: [General] Create backup feature. Copy appdata folder and registry entries to a backup file. (w5djt)
1 issue

Award Tracker – 3.3.0 (Released 2022-11-12)
0000865: [General] Update .NET requirement to 4.5 (w5djt)
0000860: [10-10 Awards] Add fixed width file export. (w5djt)
0000863: [Configuration] Add 10-10 Number and 10-10 VP number to 10-10 configuration (w5djt)
0000862: [HRN Awards] No need to add HRN registry keys. They are not used. (w5djt)
0000857: [10-10 Awards] Add option to clear 10-10 used lists. (w5djt)
5 issues

Award Tracker – 3.2.4 (Released 2020-01-16)
0000823: [General] Add Net Logger support. (w5djt)
0000809: [Database Sync] populate STATION_CALLSIGN based on ADIF 3.x rules. (w5djt)
0000810: [Database Sync] populate OWNER_CALLSIGN based on ADIF 3.x rules. (w5djt)
0000820: [Search] Unhandled exception when exporting to csv (All Fields) (w5djt)
0000806: [Configuration] move the hardcoded digital modes list to a downloadable file

(w5djt)
0000805: [Other] adif digital field list is missing FT8 (w5djt)
0000690: [CQ Awards] Add Award Summaries to CQ Awards. (w5djt)
7 issues

Award Tracker – 3.2.3 (Released 2018-11-03)
Not Released to the public. Is a beta release for SA7CND.
0000784: [Database Sync] better filtering for frequency is required in fixFrequency funciton (w5djt)
0000787: [Database Sync] Band to Frequency option does not work for ACLog databases. (w5djt)
0000788: [Database Sync] Error when importing ACLog databases when using Sweedish language settings in windows. (w5djt)
3 issues

Award Tracker – 3.2.2 (Released 2018-11-03)
0000659: [Database Sync] Missing or misconfigured fields when importing Log4OM database. (w5djt)
0000660: [Other] tempdb.mdb COL_LOTW_QSLSDATE field format is incorrect (w5djt)
0000653: [Configuration] Logger32 – Enable ADIF Audit Trail checkbox is sometimes disabled. (w5djt)
0000657: [Export] Error "COL_BIOGRAPHY " is received when trying to export to ADIF (w5djt)
4 issues

Award Tracker – 3.2.1 (Released 2018-09-10)
0000651: [Configuration] Remove requirement for Logger32 to be installed in default location (w5djt)
0000652: [Database Sync] Log4OM does not import QSO Date & CALL fields properly (w5djt)
0000647: [10-10 Awards] Add "Summary" to grid if "Show Summaries" is enabled in configuration. (w5djt)
0000628: [Database Sync] fixFrequency function should filter any non numeric characters using numbersOnly function (w5djt)
0000629: [Database Sync] several warnings and errors encountered when importing swisslog database (w5djt)
0000630: [Database Sync] swisslog database import is painfully slow (w5djt)
6 issues

Award Tracker – 3.2.0 (Released 2018-03-03)
0000626: [Database Sync] add Swisslog support (w5djt)
0000627: [Database Sync] Award Tracker database is missing the HRDLOG_QSO adif fields. (w5djt)
2 issues

Award Tracker – 3.1.0 (Released 2018-02-03)
0000611: [General] Add Summaries to awards (ARRL – Beta) (w5djt)
0000624: [OMISS Awards] Add OMISS-WAS 6 Band (w5djt)
0000625: [OMISS Awards] Add OMISS-WAS 7 Band (w5djt)
0000623: [OMISS Awards] Add OMISS-WAS 5 Band (w5djt)
0000614: [OMISS Awards] Add OMISS – WAS (w5djt)
0000622: [General] unhandled exception when using power filter (w5djt)
0000620: [Database Sync] Award Tracker incorrectly converts frequency to khz. Should be mhz (ADIF 3.0.7) (w5djt)
0000615: [OMISS Awards] Add OMISS – WAS QRP (w5djt)
0000621: [General] tempdb COL_FREQ and COL_FREQ_RX columns remove all digits after the decimal (w5djt)
0000619: [Configuration] OMISS field is not saved correctly. (Remove OMISS as a field option. No OMISS adif field exists) (w5djt)
0000618: [Configuration] OMISS configuration still has references to ACLog 3.x (w5djt)
0000616: [Configuration] Changes to the URL for HRD support files do not save. (w5djt)
0000617: [HRD Tools] Default url's for the HRD support files have moved from hrdsoftwarellc.com to ham-radio-deluxe.com. (w5djt)
0000609: [Database Sync] Unhandled exception when importing invalid ACLog database file (w5djt)
0000610: [Web Browser] When opening a website of an award a script error is displayed. (w5djt)
15 issues

Award Tracker – 3.0.1 (Released 2018-01-08)
0000606: [Database Sync] An error is generated when trying to import adif file (w5djt)
0000607: [Database Sync] Ham Radio Deluxe – unknown field name "COL_BIOGRAPHY" error (w5djt)
2 issues

Award Tracker – 3.0.0 (Released 2018-01-04)
0000605: [General] minor text changes to the splash screen (w5djt)
0000604: [Download] Code cleanup in updateSupportFiles. (w5djt)

0000590: [General] Begin migration to adif version 3 (w5djt)

0000599: [ARRL Awards] DXCC returns a dxcc value of 0 (w5djt)

0000598: [Database Sync] DXLab Database import does not populate the Country field. (w5djt)

0000603: [Database Sync] ACLog database import does not get QSL status consistently (w5djt)

0000602: [General] Add print icon next to refresh database icon (w5djt)

0000600: [Other] Create 'support' files to verify data for enumeration fields. (w5djt)

0000601: [Other] Create 'support' file for verifying adif field names (w5djt)

9 issues

Archived – Version 2.x

Award Tracker – 2.3.3 (Released 2017-11-21)

0000593: [ARRL Awards] DXCC has uncaught exception with certain data conditions (w5djt)

0000594: [Search] Begins with and Ends with search options generate incorrect sql statement (w5djt)

0000592: [CQ Awards] change default qsl type to Card + LOTW (w5djt)

0000589: [10-10 Awards] Many 10-10 awards are not returning results or generating errors (w5djt)

0000591: [CQ Awards] USA-CA date format is displayed incorrectly (w5djt)

5 issues

Award Tracker – 2.3.2 (Released 2017-07-22)

0000588: [General] Version assigned to installer is incorrect causing alert. (w5djt)

1 issue

Award Tracker – 2.3.1 (Released 2017-07-15)

0000587: [Configuration] Allow user to set default QSL type for ARRL awards. (w5djt)

0000586: [ARRL Awards] VUCC Band should populate to "VU" when selected. (w5djt)

0000585: [ARRL Awards] VUCC – Error – index and length must refer…. (w5djt)

0000584: [Configuration] Uncaught exception when clicking "All" in configuration Show Icons group box (w5djt)

0000581: [County Hunter Awards] Error received: Conversion from type 'Integer' to type 'Date' is not valid. (w5djt)

0000579: [AAC Award] Record Count for AAC results is not correct (w5djt)

0000577: [Database Sync] HRD database sync produces errors when using MySQL database (w5djt)

0000576: [Database Sync] ACLog database sync contains v4 text. (w5djt)

8 issues

Award Tracker – 2.3.0 (Released 2017-03-30)

0000575: [Configuration] 10-10 Volunteers Url is hardcoded and should be user configurable (w5djt)

0000574: [Other] fix images / colors for toolbar icons (w5djt)

0000573: [General] change the order of Awards in menu to be sorted alphabetically (w5djt)

0000569: [General] Add Asian-African Conference Award (AAC Award) (w5djt)

0000572: [Database Sync] ACLog database does not properly import TIME_OFF & TIME_ON fields (w5djt)

0000571: [Configuration] TIME_ON & TIME_OFF are missing from the search field list (w5djt)

0000570: [070 Endorsements] WAC queries have invalid date format resulting in no results (w5djt)

7 issues

Award Tracker – 2.2.3 (Released 2017-03-11)

==

0000568: [ARRL Awards] Band textbox generates "Invalid band entry 'ERR'" when loosing focus (w5djt)

0000321: [IOTA Awards] add IOTA WORLD DIPLOMA (w5djt)

0000566: [OMISS Awards] 100 OM Number Silver processes date incorrectly resulting in no records returned (w5djt)

0000134: [OMISS Awards] add 100 OM Number – Gold (w5djt)

0000252: [ARRL Awards] ARRL Awards – Add FFMA (Fred Fish Memorial Award) (w5djt)

0000253: [ARRL Awards] ARRL Awards – Add WAS Triple Play (w5djt)

0000543: [General] Add "DXBase" support (w5djt)

7 issues

Award Tracker – 2.2.2 (Released 2016-12-16)

==

0000539: [Database Sync] Add "CQ Log" support. (w5djt)

0000562: [Search] There is not a way to remove "Saved Queries" (w5djt)

0000561: [Search] When saving a new query the "Saved Queries" list is not repopulated with the new entry (w5djt)

0000558: [Other] modMain – connect database should use populateDbStatus() to set the statusbar string on main form. (w5djt)

0000557: [Database Sync] Add LOTW-ADIF support. (w5djt)

0000555: [Search] Uncaught exception when saving query with apostrophe in the name (w5djt)

6 issues

Award Tracker – 2.2.1 (Released 2016-08-25)

==

0000538: [General] Add "QSO Manager" log support. (w5djt)

0000542: [Search] Uncaught Exception "Value of '100' is not valid for 'Value'. 'Value' should be between 'minimum' and 'maximum'" (w5djt)

0000541: [Configuration] Add ability to use system default web browser instead of built in browser for viewing award url. (w5djt)

0000540: [Configuration] only show configuration tab for log program that is selected in Logging Program setting. (w5djt)

4 issues

Award Tracker – 2.2.0 Beta (Released 2016-07-25)

===

0000536: [General] Most awards are using "COL_TIME_ON" instead of "COL_QSO_DATE" for the QSO date. (w5djt)

0000537: [Database Sync] HRD database import "Access denied....Using Password NO" error with MySQL db (w5djt)

0000535: [Configuration] Add DXLab 10-10 field configuration (w5djt)

0000534: [Database Sync] DXLab – QSO_DATE field not being imported. (w5djt)

0000526: [Database Sync] Date & Time fields are not imported to ADIF compliant data. (w5djt)

0000533: [Configuration] Log Program setting is not saving Commcat 4.x setting. (w5djt)

0000532: [10-10 Awards] 10-10 WAS does not filter states from other countries (w5djt)

0000531: [Database Sync] DXLab – STX & SRX string fields create errors if certain characters are included (w5djt)

0000525: [Download] download speed indicator changes too rapidly and is basically unreadable (w5djt)

0000529: [Search] Power is missing from search fields (w5djt)

0000528: [Database Sync] HRD database import causes "Syntax Error" when importing

some empty fields (w5djt)

11 issues

Award Tracker – 2.1.11 (Released 2016-04-11)

==
